Dave Tuller, Michael Rios : Challenge Your Brain Math Logic Puzzles (Official Mensa Puzzle Book) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Challenge Your Brain Math Logic Puzzles (Official Mensa Puzzle Book):

1 of 1 people found the following review helpful. My son who loved such challenging questions enjoys doing them. Very very challenging questions :) Sometimes I have to spend time to know how to do it. My son who loved such challenging questions enjoys doing them. He now spends less time on video games and does these puzzles more. I really like it and definitely recommend to parents to want their kids to do some brain exercises as this book will make them to think. 3 of 3 people found the following review helpful. Huge variety of puzzles. By Casey I love logic puzzles, but many logic puzzle books stick to one specific type of game. This book had a great variety of puzzles, which made it much more fun to work through! I would highly recommend this book to anyone who likes a good mental challenge. 4 of 4 people found the following review helpful. Great for brainiacs. By Dream2BI bought this for my son, I took a look inside and closed it ha. But over Thanksgiving his grandpa explained some things and my little

genius wouldn't put it down. Now I need one for his grandpa ;).

Give your brain a workout on the type of brainteasers that challenge the best solvers at the World Puzzle Championships. They're tough, but fun, and the feeling of satisfaction you get when you succeed is simply unbeatable. Some of the puzzles are oldies but goodies, like battleships--and its many variants--where you search for a fleet hidden within a grid. In "Eminent Domain," try to determine which blank cells are owned by the numbered ones. For "Hex Loops," locate a path that travels through adjacent hexagons: the trick is, it has to end where it started, and the lines can't touch or cross. From Snaky Tiles to Spiral Galaxies, these Mensa-level conundrums will get your mind in shape.

About the Author Michael Rios was born in Chicago, Illinois, and has spent most of his life solving and constructing puzzles for fun. He is an IT Systems Engineer with a penchant for Linux and open source software. Mike has worked in the telecommunications and financial industries and has been a government contractor at a national lab. Mike enjoys tabletop/hobby board gaming, playing racquetball, recreational programming, and spending time with his family.
