Baby Professor : Cognitive Thinking - Kindergarten Maze Activities before purchasing it in order to gauge whether or not it would be worth my time, and all praised Cognitive Thinking - Kindergarten Maze Activities:

0 of 0 people found the following review helpful. Not for Kindergarten aged children; overpriced By ZebraThe introductory section of the book discusses crossword puzzle tips. It is more suitable for teens and adults, and after reading it, I'm sincerely baffled how it relates to this book of Kindergarten Mazes at all. Despite its short introduction, it's got grammatical errors and spelling errors much like the listing itself. Just strange but it seems to be the norm rather than the exception for Baby Professor books at the time of writing this review. The download link sends you to a [...] where you'll have to enter your email information to access their adult crossword puzzles. There are NOT any illustrations that readers can print as stated in the item listing. Again, why adult crosswords are advertised in a Kindergarten Maze book is baffling. Kindergarten aged children are usually still practicing their hand motor skills and these mazes are too long and narrow to accommodate their little, unsteady hands. There are 13 puzzles and why someone would pay the current going rate of \$10 for this book is insane. This IS the entire book, not just a sampling!! Don't let the other reviews fool you! In my honest opinion, the mazes are more suitable for grades 2 and up. If you're familiar with other Kindergarten level activity books you'll immediately recognize this as well. It seriously lacks quality and is overpriced for what it is. Currently, this item is listed for free on Kindle for free and I've committed to providing my honest feedback. 1 of 1 people found the following review helpful. Mazes are so fun! By Amanda Keith As advertised, this digital copy does not offer the full potential of the hard copy. The hard copy is a book that

kids can actually draw INSIDE of. This being said, I was still able to take a screen shot of the different mazes and open them into my drawing app. With the drawing app I was able to draw ontop of the picture right out of the book! My daughter LOVED doodling on the fun, colorful copy of the Maze. She is too young to appreciate the additional cross-word puzzle ad and fun crossword playing tips, but I found them fascinating! I had never heard of these tricks to solving crossword puzzles. I would recommend this e-book to anyone who likes to load-up their wireless device for tons of apps for their kids. There is no such thing as too many apps that your kids enjoy playing with, because if they're anything like mine, they play one app for a couple minutes and they're off to another one. This would be fun to pull up on a SMARTboard as well for Kindergarten classrooms! All of the mazes are relatively the same level of difficulty and appropriate for ages 5 and up. The author has several other interesting books available that are super educational! My only suggestion is having someone proof-read the product description as there are multiple grammatical errors. This is not a reflection of the product, as the text portions are well-written. I received this product in exchange for an honest review. All opinions are my own. 1 of 1 people found the following review helpful. I like that. This is something my son and I ...By Silverdog Unlike some other Kindle books, this one has a link to download and print these on your own. I like that. This is something my son and I can do together while we are at the cabin relaxing. My son is only 6 so this is a perfect mind challenge for him. Disclaimer - I received this ebook for free in exchange for my honest, unbiased, and fair review. In no way has this influenced my review. I rely on reviews just as much as you do and detest fake five star reviews. I very much appreciate reviewers who take the time to provide their honest and unbiased reviews and, for that, I am extremely grateful to them. When I need or would like particular products, I take the time to research those products as I do quite a lot of online shopping. I also take the time to test every product, whether received for free, at a discount, or for full sale price, to find out if the item holds true to its claim. If you found my review to be helpful in any way, then I trust that I have provided the necessary details to make your buying decision an informative and positive one. Should you have any questions, please feel free to ask away and hopefully I can provide an answer. Thank you for taking the time to read my review; it is very much appreciated.

The best way for a child to learn is to let him/her experience the lessons. Activity books like mazes will help in this regard. By navigating his/her way out of the maze, a child learn to think strategically. Constant exposure to such exercises will help mold a forward thinker. Grab a copy today!
