He's liked Dinosaurs since he was 3. It is nice to find something he doesn't have, yet. He won't actually draw in the book, (because he doesn't think you should draw in a book) but he loves looking at it and had me copy a couple of drawings with the printer. He also looks at it and draws pictures free hand. This was a great find for me. I actually bought it from warehouse deals and it was in New condition. Very pleased. 1 of 1 people found the following review helpful. Beautiful book By Stephanie Blaize My 4 year old and my 6 year old fight to color in this book! They both love it very much! It's a great way to learn about dinosaurs.

Research has shown that there are many different learning styles, and adding a tactile/kinesthetic element helps your brain to retain the information you've learned. Color Yourself Smart: Dinosaurs does just that. Have fun while learning and improve your memory with this revolutionary new series. Author Dominic Couzens has selected 52 popular dinosaurs and has compiled them here, including intriguing speculations about what led to dinosaur extinction, scientific advances in research and exploration throughout history, dinosaur biology and geography, and a geological profile for each dinosaur. Everything you need for a crash course in dinosaur history is right here in one set, ready to open and begin, or to take on the go. This incredible set includes 52 plates to color, colored pencils from Faber-Castell, and everything you need to begin your introduction to the Jurassic period. Journey back in time and explore the exciting world of dinosaurs, page by page. Color Yourself Smart: Dinosaurs offers the most holistic and fun way to learn about the largest creatures to ever traverse the land.
