1 of 1 people found the following review helpful. how to build?By Elizabeth ChristianThere were a couple beautiful

builds in the preview pics but not one house (or any other structure) to build in the book at all. :(2 of 2 people found the following review helpful. Grammatical ErrorsBy Ellen M WildermannAs an 11 year old who loves grammar, it was a bit sickening to read this book. There were also quite a few spelling mistakes as well in the eight pages of this book. "Peech"? "Horce"? I'm sorry. Just no. Also, the title of this book is "How to Build"-That's not really what it tells you. It's just steps on how to build maps. I don't mean to be rude with any of this, but I feel it had to be said...(And in my opinion, I believe this book was written to advertise his youtube channel)0 of 0 people found the following review helpful. dont readBy J.
