In Minecraft, almost everything can be customized. And the book will focus on customizable textures. For those who are unfamiliar with textures, try to digest the following explanation. Textures are image files that are used to 'paint' the world of Minecraft. Every block in Minecraft is covered with textures. A good analogy for it is a gift box. A gift box is just a regular box that is covered with a gift wrapper. And in the Minecraft world, the blocks are the gift boxes, and the textures are the gift wrappers. Now, on the internet, you can download numerous texture packs. Fundamentally, texture packs are files that contain a preset number of textures. And if you download and install them, you will have the option to change how your Minecraft world will appear on your screen. To put it simply, you are getting new gift wrappers for all the gifts you have under the Christmas tree. Since there are hundreds of texture packs that can be downloaded on the internet, it becomes difficult for players to find the texture pack they want to see on their Minecraft game. This audiobook is the solution for that problem. After this introduction is a long list of 70 handpicked Minecraft

texture packs that you will surely download and use.
