Edwin Kantar, Edwin Kantor : New Approach to Play and Defense (New Approach to Play Defense) before purchasing it in order to gage whether or not it would be worth my time, and all praised New Approach to Play and Defense (New Approach to Play Defense):

4 of 4 people found the following review helpful. Tough and goodBy B. EinhornHarder than most of his other books on play. The emphasis is on counting and visualization, not some exotic squeeze.There are 100 hands, 50 declarer and 50 defense. The problems are paired in the sense that each "theme" is presented once as a declarer play problem and then later as a defense hand, with teh hands slightly changed.Emphasis on counting, reading signals, visualization, and thinking about how the play will unfold. Will pard be endplayed? Is forcing declarer a good idea (maybe he's trying a trump coup).Excellent book for avnaved players or ambitious Intermedaites0 of 0 people found the following review helpful. 100 new problems - in matched pairs - to play both ways. This is the sequel to the first volume in which the author introduced a concept new to bridge problem books. In that book 50 brand-new hands are laid out, and the bidding reviewed. Then you as declarer, must plan the play of the hand to make the contract. The same 50 hands (or sometimes very similar) are then presented again, seen from the vantage point of the defense. This time you must figure out how

to defeat the contract! All the solutions are given, together with the author's humorous analysis of problems, bridge and bridge players. This book may be more fun than actually playing bridge.
