H Parrott Bacot : Nineteenth-Century Lighting before purchasing it in order to gauge whether or not it would be worth my time, and all praised Nineteenth-Century Lighting:

2 of 3 people found the following review helpful. Great, but.....By Small TingI am disappointed that all the pictures in this book are black and white. Other than that, it's a good book for someone who are interested in the art of lightings.

Nineteenth Century Lighting, surveys the candle powered lighting devices used in Northern Europe, the British Isles, as well as those made in America. The examples illustrated are those used in primarily domestic situations, however some are also from the public sector. Over 394 photographs are each accompanied by a detailed, physical and historical description, painstakingly researched by Mr. Bacot. In addition he has further enriched these fine examples with informative and interesting text on the changes and innovations of the period. Nineteenth Century Lighting is an

excellent and thorough source book for the collector, historian and all those interested in these revolutionary candle powered designs of the years from 1783-1883.
