If duplicate bridge is your passion, and you are a fanatic, I highly recommend these books!By Jennifer FOliver Clarke's Super Precision (OCP) is for hard core fanatics of the card game bridge.The simple version is probably WAY more complex than any bidding system you've ever learned. You will need volumes 1 and 2, a total of 600+ pages. It takes about two years of concerted effort to become proficient. If you are a student of the game, and already a decent player, this system will help you RELIABLY find game and slam

contracts much more often, as well as keep you out of slam contracts that just aren't there despite appearances to the contrary. Imagine holding 16+ hcp (a 1 Club opening), getting a positive response (8+ hcp) from partner of 1 Heart or 1 Spade. You can immediately bid 1NT to get a complete count on ALL Aces and Kings in a single step response. You immediately know how likely a slam contract is. Imagine for a slam investigation needing to know your partner's holding is a specific side suit, specifically length and number of top three honors. The asking bids in this system give you both of these. I play this system whenever I can. I have about a dozen friends at THE best online bridge site on the web, Bridge Base Online [...] If one of them is available I play with them - period! Learning this system has catapulted my entire game. With it comes a disciplined approach to the game that I did not have even after playing the game for 40+ years. 0 of 0 people found the following review helpful. Precision for the serious player By MJ Lover This is one of a kind book on a difficult bidding system 0 of 0 people found the following review helpful. Five Stars By John L Lute A Precision system on steroids

Volume One contained the system's fireworks and artillery. Now enjoy the basic foundation of the system - its intermediate strength openings - with Volume Two. If you are considering making the leap to Precision, this is the book for you. Written with the Beginner-Intermediate player in mind, this book will help you master the transition. OCP is one of the best kept secrets in the bridge world. This hidden gem was developed by world class players who quickly demonstrated its brilliance before it quickly and quietly slipped away as one of its originators stopped playing competitively all together while the other concentrated on playing with his brother and his brother's less esoteric system. Now the system is being awakened and rediscovered due to its ability to find and bid slams which is head and shoulders above other systems as clearly demonstrated in Volume One. Volume Two will demonstrate its adeptness at finding razor-thin game contracts and simply solidifies its overall standing as a world class system. Give the OCP system a try - it does take some effort - but those efforts will be well rewarded. Joining the growing legion of OCP practitioners and take your game to the next level. Oh, almost forgot the best thing about this system - it's darn fun to play!!
