I was a huge fan as a child and remember loving this book when I first got it. I have recently purchased all the Edition 1 DD books for nostalgic reasons.... i love looking through them and remembering the "good ole days".0 of 0 people found the following review helpful. and he is very pleased and satisfiedBy CustomerPurchased as a gift, and he is very pleased and satisfied.....was told to give a good rating if asked....thank you3 of 3 people found the following review helpful. Old and fun but...By DrewAny one who has been gaming since the 80's is likely to remember this work. I bought it in a binge of nostalgia.I still don't like the Cavalier or the Acrobat Thief, but I do like the weapon specialization and a few other bits it brought to the game. What player of an Illusionist doesn't remember Chromatid Orb?However the work arrived smelling like it had been in a musty basement for the decades it had been and had at least one illustration lovingly removed..Oh well it was used.

Includes spells, character classes, magic weapons, and other items used in playing Dungeons and Dragons.
