"May the light of azarath be with you"By DamiSamus the worlds deadliest bounty hunter does nothing but please in this one with amazing graphics for a game ahead of it's time a great story line with artistic characters and the new abilities with samus's arm cannon is just mind blowing. The concept art is beautifully and the game play is viciously addicting. This is something you must have in your game cube collection and is a great addition to an game cube collection. But even if I didn't LOVE Metroid the way I do, this is still a quality print. Great pictures and explanation of what to do without spoiling the game for you. Echoes is a bit confusing because it's easy to get lost in the Light and

Dark worlds and as in my case, I hadn't played in a while, so I completely forgot what I was doing, this book helped me get back on track.0 of 0 people found the following review helpful.
