This book has so many well thought out problems, that your game has to improve the first time through. I've been through this book several times now, increasing my speed (and mostly my technique) while getting as much enjoyment as the first time through. When using my newly acquired skills in real games, I've "Dazzled" more than a couple of players; having your opponent say "I didn't even see that coming" is a direct result of the insight gained reading this book. This book seemed free of errors (i.e. all problems were solvable and all problem numbers matched their corresponding solution number). I look at a checker board with a little more confidence now, and take my hat off to Robert Pike. I would recommend this book to anyone without reservation.0 of 0 people found the following review helpful. deeper than some shallow supposeBy David McCanncheckers is not chess; but it is not, as some suppose, mere child's play.an adult checker player even a good one will lose to an expert EVERY TIME.and if

YOU study and apply this book, your children and grandchildren may do too.0 of 0 people found the following review helpful. Terrific puzzlesBy Douglas K. NielsenThe book is actually a "little" book but it has some big puzzles needing some thought to figuring out. My goal is to solve a puzzle each day until I get good at checkers.

Universally popular, the "mind sport" of checkers is one of the world's oldest board games, and one of the most elegantly structured. Although children can readily understand its most basic rules, on a higher level checkers can demand great depth of strategic thought. Put your skill to the test with these puzzles--all based on the standard American game. (Federation rules appear in their entirety.) Each is winningly solvable in no more than six and a half moves, and often less by the player who goes first. In numerous problems, the winner even seems at a serious disadvantage at the start. Quite a few of the solutions list alternative patterns of play that depend on the moves chosen by the player destined to lose.
