From Routledge : **The Making of the American Landscape** before purchasing it in order to gage whether or not it would be worth my time, and all praised The Making of the American Landscape:

The only compact yet comprehensive survey of environmental and cultural forces that have shaped the visual character and geographical diversity of the settled American landscape. The book examines the large-scale historical influences that have molded the varied human adaptation of the continents physical topography to its needs over more than 500 years. It presents a synoptic view of myriad historical processes working together or in conflict, and illustrates them

through their survival in or disappearance from the everyday landscapes of today.
