**From Running Press : The Mammoth Book of Codeword Puzzles** before purchasing it in order to gage whether or not it would be worth my time, and all praised The Mammoth Book of Codeword Puzzles:

Now don't get me wrong, there are plenty of puzzles in it, it's the physical size of the book that I don't like. I expected it to have large pages like your average variety puzzle book (magazine sized), but instead it is a rather thick book that is just a bit larger than a standard paperback in size. Personally I like the larger codewords better, and also with the size and thickness of the book I find it hard to write in

the book, especially the puzzles on the left side. And the boxes that you write in are slightly smaller than your standard ones as well...which I also don't like. That being said, the puzzles are well done, not too hard and not too easy, just challenging enough to be fun. And there are a few other puzzles thrown in the mix as well. But I will continue my search for a large size book of codewords....0 of 0 people found the following review helpful. Great Puzzle Book but found an error ...By MarjonI am trying to find a 2nd edition if there is any. It is great because it includes not just more than the usual number of codewords but other puzzles as well. I do not like Drop Out because some of the words go on to the next line and you would not know whether one of the boxes contain a letter or a punctuation. I probably will get used to this in time. Also I noticed that on Codeword #236, there was an ERROR. Instead of 18 being S, it should be A. I had a hard time solving this puzzle because of this and I finally gave up and checked the answers. This is why I am rating this a 4 instead of a 5.UPDATE: 1/18/16. DROP PUT - finally got the hang of it and it is quite addicting!!!7 of 7 people found the following review helpful. hours and hours of fun.By Paula S. SmithRealy great if you like codeword. More than 400 puzzle equals hours and hours of fun. Other than codeword puzzles there are 3 other types of puzzles every so often. They are fun as well

Word puzzles, cipher crosswords, whatever you call them, codewords are hugely popular for stimulating the brain! A bumper collection of graphed mind games--as seen in the Washington Post's Crickler--plus other puzzles like dropouts, keywords, coded quotes, and long diversions.
