WalcherAnyone who grew up in the mid-60's, remembers the Monkees. This is a great bookfilled with fun facts and takes you back in time.0 of 0 people found the following review helpful. Finally! A Monkees collectible book!By Kevin StaffordI am late on reviewing this book but had to comment. I LOVE this book. Very goog work and research! Great photography! It's so nice to see someone put this much effort in a Monkees collectible book. My only complaint is the records are not valued correctly. We need a Monkees record collecting guide. If not for values, just to see the great world wide covers of the albums, single and EP's that differ from country to country.Marty Eck (Is that his real name?)bought most of the items in this book. Since most of us could never

afford such a collection or FIND some of these gems, this is a great coffee table book. Again with putting values on collectibles, any kinds, is a matter of supply and demand. To me, Ebay is where I usually can find recent values. Being a Monkees record collector, I am thinking of joining forces with a major collector in the UK to create the book I always wanted. This book is a great asset to anyone's Monkees collection! Buy it!
