It just didn't have enough pages for the cost in my opinion. I would suggest that someone buy the game before they bought the book. One plus with the book is the ability to play solitarily, while you need others to play the game. It surely makes you think!1 of 1 people found the following review helpful. Needed by old and young for the MINDBy BarbieBought this for myself (74ish)and love the challenge. My 7

year old grandson saw me doing it and got the hang of it right away. He now owns his own book and he keeps it by his bed and does it each morning. 1 of 1 people found the following review helpful. good mind exercise By Kinaset is one of my favorite games. this is a nice individual version where you can do one page at a time whenever you want. I like the level of difficulty. a great puzzle book to keep your mind sharp.

From the website of THE NEW YORK TIMES: the hottest, most addictive game around now in book form! One solid red diamond. Two solid green ovals. Three solid blue squiggles. Presto-you've got a set! Three of a kind or three with nothing in common: that's what solvers are trying to find in Set, the popular game of visual perception. Originally played with cards, it's also fun on the page. This collection, based on a popular daily feature of The New York Times online, will be welcomed by longtime fans and newcomers alike, who can either play it solo or in a group. Just examine the group of designs carefully for number, color, shape, or shading. But remember, you have to take every element into account. With its unique mixture of visual intelligence and logic, The New York Times Set Puzzle Book will appeal to anyone from 10 to 100.
