By D. A. I am not a professional arrowhead collector by any means but I enjoy learning about them and have been fortunate once in awhile to come across one. This book is excellent for the purpose of learning about the different kinds of arrowheads, lance points, knives, hand axes etc. It includes history of points. There is a chronological gallery of color points in the front, the rest of the photos are in black white and the book is sectioned into regions to make it easier to learn what is most likely to be found in your area. For those inclined, it also includes what to look for as a collector and the estimated value of your point/s etc. I like this book!
